

Assessment Tomorrow

Conference

Edinburgh - 2018

12th Scottish e-Assessment Conference

“Digital Assessment Futures – Making a difference”.

Grosvenor Hilton Hotel, Edinburgh 1st February 2018

About the Conference

This, the twelfth Assessment Tomorrow conference in Scotland in association with SQA, takes as its theme “Digital Assessment Futures – Making a difference”.

Raising levels of attainment is a high priority for everybody involved in the delivery of Scottish education. At the same time, digital developments provide teachers and learners with even more innovative and easily accessible tools to support the raising of attainment levels.

As usual with this conference, our speakers will be a mixture of experts who are working directly with the technologies, schools and colleges who are finding innovative ways of using technologies and, from SQA, a view on where policy and qualification developments are taking the use of technology.

A key section of the programme is designed to provide delegates with practical case studies of the use of technology. Like-minded practitioners will demonstrate how they have implemented technology and its impact on learning and achievement. Delegates will be asked to bring their own mobile technology to enable them to experience the practical value of some of the case studies.

At the same time, SQA is in the process of thinking beyond the current use of technology in assessment and its management and the conference will give a glimpse of their future thinking.
